SIMSCREEN®

Looking to Enhance Observation During Simulations & Skills Validations?

SimScreen® provides:

01. Increased Observation & Communication
02. Decreased Distraction & Unintentional Guidance Cues
03. More Accurate Student Performance Evaluations

Why Educators Love SimScreen®

- Two-Way Mirror Technology:**
SimScreens® are manufactured using mirropane technology which is highly reflective on one side and transparent on the other.
- Facilitates Hands-on Learning:**
Research shows that by removing the instructor from the simulation, it produces a more capable student.
- Portable:**
SimScreen® panels can easily be moved from one classroom to another, to create a control room anywhere in your classroom or simulation lab.

Frequently Asked Questions

Q: Why should our training center use a SimScreen®? Why do I need to hide from my student?

A: You may think that being in the simulation lab with your students facilitates hands-on learning, but research shows that by removing the instructor from the room, it will actually produce a more capable healthcare professional. Students instinctively look to the instructor to determine their best course of action rather than using their own critical thinking skills. The presence of an instructor in the simulation room provides cues and guidance to students through body language and unintentional behaviors. This occurs subconsciously even if the instructor makes every effort to remain a neutral observer. SimScreen® allows students the opportunity to realize how their clinical decisions will affect patient outcomes.

Q: What are the dimensions of SimScreen®?

A: A standard SimScreen® is six (6) feet tall, three (3) feet wide and weighs 78 pounds. By combining two (2) SimScreens you can create an observation window the size of a standard hospital bed or office desk.

Q: How does SimScreen® work? What does the student see when looking into the mirror?

A: SimScreen® uses Mirropane technology commonly known as a "two-way mirror". The screen is highly reflective on one side preventing the student from looking back at the instructor. From the instructor's point of view they can observe the student without any distortion.

Q: What if I want a custom sized SimScreen®?

A: We Can Do That! Our knowledgeable account managers can work with you to find the best fit for your facility's needs.

Q: Is there any warranty available with SimScreen®?

A: DiaMedical offers a full one (1) year warranty for all SimScreen® products.
